

Kevin Merck

Software Engineer

734-679-8007 | [Kmerck88 \(Kevin Merck\)](#) · [GitHub](#) | [LinkedIn](#) | [Personal Site](#)

CAREER SUMMARY

Innovative Software Engineer with over 2 years of hands-on experience in driving product lifecycle from inception to launch. Proven track record in collaborating with global stakeholders to deliver high-quality solutions.

Core Competencies:

- Design Thinking
- Community Management
- Strategic Planning
- Process Improvement
- Systems Design
- Cost Control

SKILLS

-
- **Software & Tools:** Git, Jira, Asana, Airtable, Trello, GraphQL, Microsoft SQL Server, Tableau, Microsoft Office Suite (Excel)
 - **Programming Languages:** C#, SQL, jQuery, React.js, Node.js, Python, CSS, HTML, Java, JavaScript

EDUCATION & CERTIFICATIONS

-
- **CompTIA A+, Network+ CE** (In Progress)
 - **Google Professional Machine Learning Engineer Certification** (In Progress)
 - **CompTIA IT Fundamentals (ITF+)**
 - **After-Hours Full-Stack C#**, Grand Circus Bootcamp
 - **Cisco Networking Academy, Computer Hardware Basics**
 - **Associate of Applied Science in Business Administration**, Wayne County Community College District

PROFESSIONAL EXPERIENCE

Workplace Support Ambassador, Rocket INC, Detroit, Michigan

June 2011- PRESENT

- Provide **technical support** for desktop PCs, laptops, docking stations, and peripheral devices.
- Collaborate with **cross-functional IT teams** to enhance workplace operations for over 500 clients, achieving a 95% satisfaction rate.
- Utilize **problem-solving skills** to reduce system downtime and improve user experience.
- Maintain the workplace according to **SOP standards**.

PROJECTS

PROJECTS

Automating Web Application Deployment with CI/CD on AWS:

- Built and deployed a CI/CD pipeline to automate the deployment of a web application, including stages for build, test, and deployment.
- Deployed the application on AWS EC2, setting up secure and efficient network configurations, including security groups and key pairs, to ensure accessibility
- Conducted automated testing to maintain code quality and deployment readiness, collaborating with cross-functional teams for continuous improvement.
- Tech Stack: AWS (EC2, CLI, Security Groups), Jenkins/GitHub

Java-Based Web Application Deployment & Environment Configuration:

- Created a new IAM user with admin permissions for enhanced security, avoiding direct use of the AWS root account
- Set up VSCode as an IDE for writing, debugging, and deploying code, establishing a connection to an EC2 instance for direct remote development.
- Installed Apache Maven and Amazon Corretto 8 on the EC2 instance to manage dependencies and streamline project builds for a Java-based web application.
- Leveraged Maven to generate a Java web application from a template, establishing a foundational structure for future development.
- Tech Stack: AWS (IAM, EC2), VSCode, Maven, Amazon Corretto 8, Java.
